

WORKSITE GENERATORS

MX7000ES 7kVA / 5500W Electric Start Petrol Generator

Power You Can Rely On, Built for the Jobsite

Our worksite generators are engineered with tradies in mind - delivering the durability, reliability, and performance today's demanding job sites require.

Built to withstand harsh conditions, these generators offer consistent power, fuel efficiency, and easy maintenance, all backed by responsive on-site support.

Whether you're running heavy equipment or essential tools, our generators keep your site powered and your project on schedule.

TECHNICAL INFORMATION

Voltage:	240V
Amperage:	20.8A
Displacement:	389cc
Engine Speed:	Constant 3600 rpm
Outlets:	2 x 15A IP66
Rated Power:	5000W
Max Power:	5500W
Starting Method:	Recoil / Electric / Remote Control
Noise Level:	96dB
Fuel Tank:	40L
Rated Frequency:	50Hz
Battery:	12V 14Ah Lead Acid
Fuel Running Time @ 50% Load:	17.5 hours
Fuel Running Time @ 100% Load:	14 hours
Generator Dimensions (LxWxH):	710 x 536 x 605mm
Net Weight:	85kg
